

Passionately Driven

At Forum Pharmaceuticals, the effects of mental disorders like schizophrenia hit close to home.

We understand firsthand how these disorders affect not only the patients themselves, but their loved ones and friends who interact with them every day.

When people suffer from schizophrenia and other mental diseases, a shadow is cast over them, preventing their true personalities from being revealed to the world.

Our mission to finding a cure for schizophrenia and all neurodegenerative diseases is personal and heartfelt.

We will not stop relentlessly pursuing this goal until neurodegenerative diseases have been completely eradicated and all our patients have returned to enjoying a life of normalcy again.

Finding A Cure With More Than The Mind

Commitment to the mind...  ...comes from the heart
